

## COMPANY OVERVIEW

**Rensat Group** was born out of a simple but powerful idea — that construction support systems should be as strong in quality as they are in purpose. As a forward-thinking organization, we are now charting new territories with plans to expand our footprint across the globe..

We specialize in manufacturing Scaffolding, Formwork Systems & Accessories built to perform in real-world site conditions. Our products are not just functional — they're reliable, durable, and safe. Every Rensat solution is backed by technical expertise, strict quality controls, and decades of hands-on experience.

## VISION AND MISSION

#### Vision

To become the #1 trusted global brand for scaffolding and shuttering equipment, known for quality, ethics, and growth partnerships.

#### **Mission**

- Deliver safe, durable, and globally certified scaffolding systems
- Create win-win solutions for contractors and importers worldwide
- Position ourselves not just as vendors — but as business growth partners

## MEET THE TEAM

**Shivam Sharma** (Managing Director)

Sahil Sharma
(Director Global Business)

Parul Bali (Marketing Head)

Our leadership team drives the company's vision with experience, expertise, and passion, ensuring the delivery of innovative, high-quality solutions globally.

However, the true strength of RENSAT Group lies in the many unsung heroes—our dedicated staff members—whose hard work and commitment power every success

#### MANUFACTURING PLANT

We operate with a focus on in-house manufacturing, ensuring complete control over quality, design, and delivery timelines. From raw material processing to final product packaging, every step is managed with discipline and attention to detail.

#### **What Makes Our Plant Different?**

- ✓ Fully In-House Production: Total control over processes, from start to finish.
- ✓ Machinery That Matters: Equipped with hydraulic presses, cutting tools, welding bays, threading machines.
- Lean Manufacturing: Optimized workflow, minimal waste, and fast turnaround.
- ✓ Flexible Output: Capable of handling highvolume orders.
- ✓ Skilled Manpower: Trained teams focused on accuracy and consistency.

Every Rensat component — be it a cuplock system, ringlock system, or prop — is manufactured under tight supervision. We implement multi-stage inspections, including:

- Material hardness and thickness tests
- Dimensional checks
- Load testing
- Surface coating inspections

Our factory operations comply with export-grade standards, and we work to align with ISO procedures that our global partners trust.

## EXPORT PACKING

At Rensat, we prioritize the safe and efficient transportation of our Scaffolding Equipment to customers worldwide. With over a decade of experience, we ensure every product is meticulously packed and loaded to meet international shipping standards.

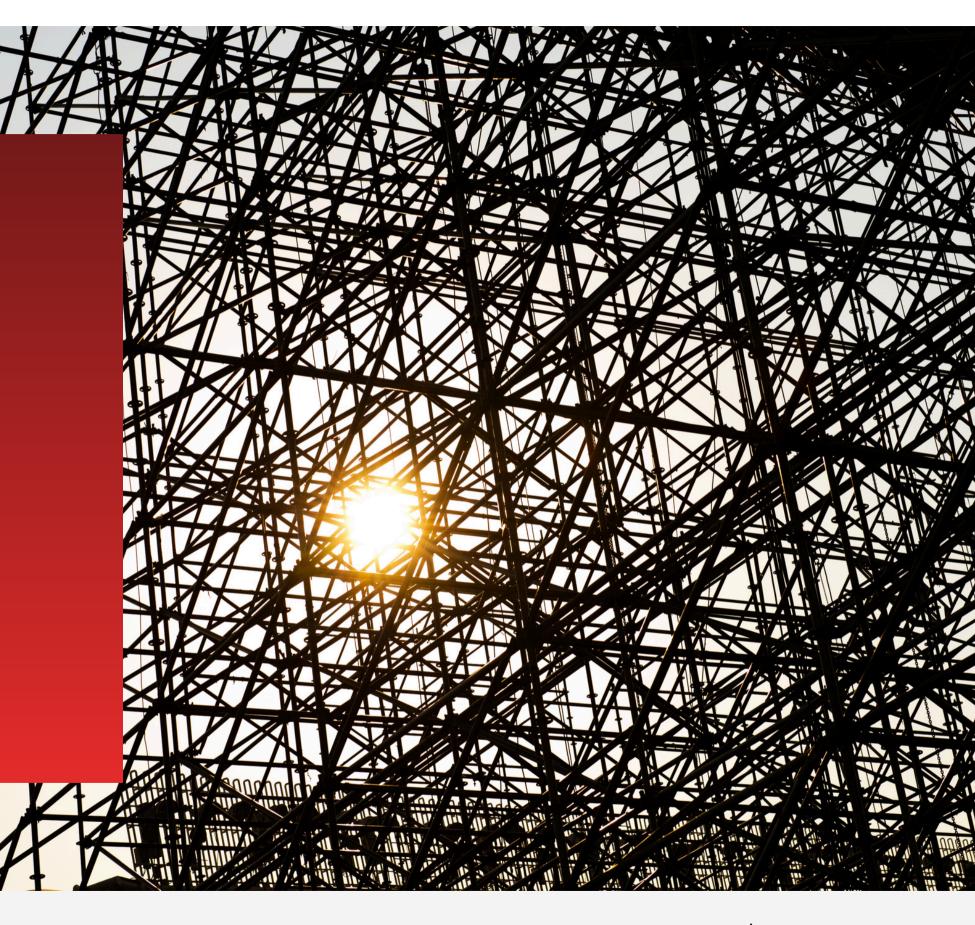

- **Durable material-** We use high quality pallets designed to withstand long distance shipping.
- **Weight Optimization-** Each pallet is optimized for weight and balance to reduce handling risks.
- Strategic Arrangement- Products are loaded systematically to maximize space utilization while preventing damage during transit.
- **Quality Checks** Our team conducts thorough inspections at every step to ensure compliance with global export standards.
- Secure Loading Techniques Advanced techniques & tools are used to secure pallets inside containers, ensuring they remain intact from dispatch to delivery.
